Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I (claims 1-5) in the reply filed on 3/11/05 is acknowledged.
2. Claims 6-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/11/05.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gerber, U.S. Patent 4,060,016.

Gerber discloses the same invention as claimed including, e.g., a frame (10); a support surface (12) mounted on the frame for carrying at least one layer of sheet type work material (14); a carriage (30) coupled to the frame for movement back and forth there along in a first coordinate (X, as shown in Figure 1) direction in response to commands issued from a controller (20); a cutting head (16) mounted to the carriage for movement back and forth there along a second coordinate (Y, as shown in Figure 1) direction generally perpendicular to the first coordinate direction in response to commands issued from the controller (20); a rotary die (32) rotatably coupled to the

Art Unit: 3724

cutting head; at least one cutting tool (46) coupled to the rotary die (see Figure 4), the cutting tool is shaped to match the desired cut in the work; the rotary die being movable between a working position and a non-working position by actuator (36/38/40, see Figure 4).

Allowable Subject Matter

5. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to disclose the use of, *inter-alia*, rotary die notching tool with at least one cutting tool attached thereto in combination with a cutter coupled to the cutting head for movement between a working position and a non-workpiece simultaneously with the rotary die.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. The prior art references cited but not relied upon were cited to show similar devices in the art.
